### Discover the REVOLUTION Private Label Program?

REVOLUTION builds the strongest, most durable and reliable floor machines on the market. Now, REVOLUTION makes it easy for you to combine your company's brand recognition, reputation, and business skills with our quality products and superior marketing supports through the *REVOLUTION Private Label Program*.

### Why Private Label?

- Your Private Label Brand makes you unique from your competition and gives you pricing flexibility.
- You're building brand recognition in your market area.
- Having and phone number on a product label is like having a mini-billboard that is seen every day. You're reminding and encouraging your customers to call you with aftermarket orders and equipment re-orders.
- Your clients are another step closer to one-stop shopping.

### How Does the REVOLUTION Private Label Program Work?

Our private labeled products are an affordable assembly of equipment labels, instruction manuals and warranty cards that carries your product name, brand name, corporate name and logo, and contact information.

You provide us with the logo, preferred product names, and address information. We will do the rest . . . giving you your own private labeled product line.
